SUBJECT: Comments on the Site Investigation for the
Installation Restoration Program at the
Naval Air Station Glenview, Illinois

FROM: Jeff Gagler 
Monitoring & Special Programs Coordinator
Water Quality Branch

TO: Bill Franz, Chief
Environmental Review Branch

We appreciate the opportunity to provide comment on the above subject. Surface water quality issues are discussed in Chapter 10 of the report. Pages 350-351 contain the surface water quality recommendations, which includes the need to develop an additional study, along with additional monitoring and sampling to accurately determine potential hazards and percent contributions. We do concur with the presented recommendation, but we do suggest that a schedule be presented for both the study plan and sampling. We also concur with the study identifying and quantifying contaminants from sources located on the Naval Air Station and off-base. It is important to coordinate proposed water quality study with other recommended remedial investigations in order to demonstrate remediation of water quality impacts.

If you have any questions, please contact me at 886-6679.
